Your reference: RPI17-001

30th October 2023

To: Director Development Assessment Division Planning Group.

Dear Sir,

Thank you for your Requirement Notice letter dated 23rd of May 2023 and your subsequent Approval to Extend until 21st November 2023. We reviewed your comments and have provided a tighter definition in Attachment 1 Table 2, which is reproduced below.

1. We confirm the Pilot Water Treatment Plant and Process Plant are two discrete elements of the project separated geographically however, both facilities are located within State owned allotment 1/RP860374. We have provided additional details of the water treatment plant which is a Pilot Water Treatment Plant being run as part of our commitment to the State of Queensland to build a new water treatment plant.

2. We have broken the Project Support Facility definition down into two parts namely, "Administration Security & Laboratory Building" and "Workshop and Maintenance Area". These two discrete components of our project separated geographically, have now been properly referenced in line items two and three in Attachment 1 Table 2.

3. We confirm that the car park whilst it is further than 350 meters away from Gordon Lane will be asphalted during operations.

We acknowledge that you have confirmed that public notification is required. We will advertise this within 10 business days of the date of this letter, for the allocated 15 days.

Thank you for your time and for assessing this application and please contact us should we need to change anything regarding our notification.

Yours Sincerely,

Peter Mellor

Director

Heritage Minerals Pty Ltd

HERITAGE MINERALS

Attachment 1 - Table 2: Definitions

Resource activity	Definition
<u>Mining resource for extraction</u>	A Mineral Resource that has been sufficiently defined to be incorporated into a mine plan for extraction – Ore Reserve (refer to the definitions for ‘Mineral Resource’ and ‘Ore Reserve’ in the <i>Australasian Code for Reporting of exploration Results, mineral Reserves and Ore Reserves 2012 – JORC Code Australasian Institute of Mining and Metallurgy</i>) and specifically, gold, and copper concentrate for sale.
<u>Rehabilitation</u>	Post mining, land is to be rehabilitated in accordance with the Environmental Authority conditions governing the operation.
<u>Possible future exploration</u>	Exploration activity using standard industry methods may be required in the future to determine if additional mineral resources are present.
<u>Process Plant</u>	The processing of extracted mineral resource using standard industry techniques to recover gold, and copper sulphide for sale.
<u>Mine Haul Road</u>	The haulage route for transporting extracted resource to the Process Plant by trucking.
<u>Tailings storage facility</u>	The containment facility to store reject material from the Process Plant in accordance with the Environmental Authority conditions.
<u>Administration, Security and Laboratory building</u>	Administration building, laboratory building, security facility, carpark, workshop
<u>Pilot Water Treatment Plant</u>	Mineral processing by water treatment to recover mixed metal oxides and metal pyrophosphate compounds for sale
<u>Workshop & Maintenance Area</u>	Mining equipment park-up
<u>Carpark</u>	Carpark adjacent to the Administration, Security and Laboratory building
<u>Mine lease access road</u>	The road that comes into the mine leases off Gordan Lane
